

Matrix Economics is a boutique economics consulting firm, specializing in high-profile antitrust litigation and merger reviews. We assist corporate clients and government agencies in developing rigorous and compelling economic evidence to evaluate issues of market definition, market power, and competitive effects of alleged anticompetitive conduct or proposed mergers. We are actively seeking to fill positions at the Analyst level.

### Responsibilities

Our Analysts work on teams with Ph.D. economists to address the complex issues facing our clients. This work entails:

- Conducting research into firm, industry, and marketplace behavior;
- Developing careful data-driven approaches, including regression analyses, using Excel spreadsheets and programming languages such as Stata, R, SAS, and Python;
- Participating in meetings with Matrix team members, academic experts, and clients;
- Assisting in the preparation of expert reports and other client deliverables.

### Qualifications

Matrix Economics cultivates careful analytical thinking in a team-oriented collaborative work environment. We are seeking highly-motivated recent college graduates with a degree in economics, statistics, or a related subject, with an interest in analyzing real-world problems. We place a high value on intellectual curiosity, critical thinking, the ability to communicate clearly in writing and orally, strong quantitative and programming skills, a willingness to take initiative, a dedication to high quality, a strong work ethic, creativity, good interpersonal skills, and a positive team-oriented attitude. Analysts are expected to learn quickly; apply their academic training; solve problems; organize and present their work; and communicate well with colleagues and clients. The work provides Analysts with exposure to the business, legal, and academic worlds and serves as a basis for many to pursue M.B.A., Ph.D., or J.D. programs.

### Joining our Team

With our small size, Matrix Economics offers great opportunities for personal development and a chance to influence company culture from the ground up. We offer:

- Competitive salary and benefits;
- Dynamic work environment;
- Direct access to senior leadership;
- Tailored training and mentoring.

Our office is located in Boston's Financial District. Check us out at: [www.matriceconomics.com](http://www.matriceconomics.com).

### Application Process

We are an equal opportunity employer committed to a diverse workplace. Interested Analyst candidates should send or arrange to have sent to [recruiting@matriceconomics.com](mailto:recruiting@matriceconomics.com) each of the following: (a) cover letter; (b) resume; (c) writing sample; (d) transcript; and (e) two or three letters of recommendation.

We accept applications on a rolling basis. Applicants interested in being considered for our first-round interviews should have applications completed by Friday October 26, 2018.
